PATENTED ROSES

PLANT PATENT NOTICE: The following provisions apply to all patented plants we sell:

Each plant so indicated is a patented variety under the laws of the United States and any asexual reproduction or distribution by sale, gift, or otherwise of scions, buds, or cuttings for such reproduction, without license from patent holder, constitutes an infringement of the patent. Any unauthorized reproduction sale or other distribution of reproducing propagating material of these patented plants, prohibited by the patent under these names, will subject the reproducer, seller or distributor thereof to prosecution for infringement under the United States Patent Laws.

Terms and Conditions of Sale

TERMS: 2% 15 days, no discount after that time. 30 days net unless otherwise arranged at time of ordering. Costs incurred in actions to collect accounts will be added to original invoice.

SHIPPING:

Bush Roses: Weather permitting, deliveries and shipments will start about mid-December where desired. Eastern, Midwest and Southeast shipments move forward in pre-paid refrigerated cars to centrally located cold storage warehouses. California and Southwest shipments move forward by motor freight.

Tree Roses: Tree Rose bulk prohibits use of pool cars for Eastern, Midwest and Southeast shipment. Tree Roses to these points move forward by Railway Express, F.O.B. Ontario, Calif. Modern lightweight packing methods enable shipment to reach customer at a minimum cost per tree. California and Southwest shipments move forward by motor freight.

CLAIMS: Must be made promptly on receipt of shipment and all unsatisfactory or rejected goods held for our advice or disposition. We will gladly entertain such reports and make satisfactory adjustments when claims are definitely established.

PRO RATE: All orders are booked subject to crop yield and pro rate in the event of a smaller crop than anticipated should injury befall seller's stock from fire, frost, floods, drouth, disease, etc.

GUARANTEE: We give no warranty express or implied as to life, description, productiveness of any stock we sell. We exercise care to have all stock true to name, however it is understood that should any stock prove untrue to name we shall be liable only for the sum paid for stock which may prove untrue to name and not for any greater amount.

PACKING AND BOXING AT COST.

Again "Rosy" Greetings

We used to follow Grandmother while she walked among the roses she loved and she often admonished "as you grow older, the time passes more and more swiftly."

We must be "getting on" for it seems the years pass in such rapid succession it is ALWAYS time to be getting out a new Rose list. Well, so we **are** getting on. What better way to add year upon pleasant year than doing a bit to make America more beautiful? In our business there are hardships and failures and dark days when it seems "there just ain't no fish." Yet, we take a sort of stubborn pride in our belief that the Nursery Industry contributes mightily to our American heritage and to a way of life that is good. We know the road is rough and the way is long to gain for our Nurserymen the recognition that is their just due, and as we travel this road we are constantly reminded that "every great and commanding movement in the annals of the world is the triumph of enthusiasm; nothing great was ever accomplished without it."

And so, again this year, we are enthusiastic about our new list of Roses. Once more the list contains some brand new names—roses in commerce for the very first time. The two new All America Winners, of course, WHITE BOQUET and GOLDEN SHOWERS, are included, and it goes without saying the solid old kinds that wear so well year after year are still available.

With enthusiasm too, we look forward to hearing from all of you during the coming months for we find the pleasure increases each time we serve you!

GRANDIFLORAS

This new class established in 1954 by All America Rose Selections, is consistently a vigorous, rather tall growing plant and produces continuous masses of blooms both on single stems and in clusters. Although the kinds in this class are now quite limited, new creations from the world's hybridizers are increasing annually.

-**CARROUSEL** (Pat. 1066), crimson buds open to velvety red showing yellow stamens, resistant to burn from heat or cold.
-**DEAN COLLINS** (PPP), spirea red, billeted by its introducers as the "lazy gardeners rose," demanding a minimum of care for a maximum production of large blooms with long cutting stems and also in candleabra effect.
-**QUEEN ELIZABETH** (Pat. 1259), first AARS winner in the Grandiflora class in 1955, orchid pink, high centered blooms, profuse bloomer bearing hundreds of blooms both singly and in clusters during the blooming season, undoubtedly one of the most distinctive and eye catching roses of all time.
-**BUCCANEER** (Pat. 1119), of the brilliant yellow of High Noon, semi-double delightful buds. As is normal with the Grandiflora, Buccaneer too produces these lovely yellow buds and open flowers in constant profusion on long cutting stems and in cluster.
-**MONTEZUMA** (Pat. 1383), rich, coppery, bronze-orange, long slender bud produced again in cluster profusion and on single stems, tall free branching bushy plant, very unique shading in a rose reminding its originators of the bronze of the days of Montezuma, hence the unusual name.
- ROUNDELAY** (Pat. 1280), dark red bud opens to somewhat lighter red full flower, petal arrangement is neat and full with camellia effect, lasts very well cut and on bush, delightful fragrance, Grandiflora characteristics also outstanding in Roundelay with single stems and clusters.

FLORIBUNDAS

(Red)

-**BABY BLAZE** (Pat. 1362), a new floribunda that looks like a miniature of that grand old favorite, Blaze. Blooms continuously.
-**BABY CHATEAU**, crimson to red shaded garnet
-**CHATTER** (Pat. 739), velvety bright crimson, immense clusters cupped flowers, old rose fragrance
-**CRIMSON ROSETTE** (Pat. 901), crimson, rosette type buds, blooms in cluster

ALL AMERICA ROSE SELECTIONS

Since its founding in 1939, AARS has declared only 46 All Americas and regional award winners. Listed below as a matter of general interest are the AARS varieties and introduction year.

AARS continues to intensify its rigid trial testing in 22 official test gardens throughout the United States; hybridizers are concentrating more and more on a combination of beauty, usefulness and hardiness in their new rose creations. From our own growing experience we note an increasing incidence of high Number 1 Grade yield from our budding of these All America Rose Selections.
